Projects

| Student Management System |

- Working: A simple web application where teachers can add, edit, and delete student details. It helps manage a list of students efficiently through a user-friendly interface.
- Tools Used: React, JavaScript, HTML, CSS
- Storage: Browser’s LocalStorage is used to store and retrieve student data without using any backend or database.

| Spotify Clone |

- Built a responsive music player UI using HTML, CSS, and JavaScript that mimics Spotify’s interface and controls.

| Country Info Explorer |

- A React-based web application that displays information about countries including name, capital, population, borders, region, and more.
- Fetches live data from the REST Countries API and presents it in a user-friendly interface.
